(2) Comment: The report does not indicate whether the ammunition was destined for the Soviet Army or the German Volkspolizei. How-ever, as VP units have so far been supplied with a munition (primarily former German ammunition) from Soviet Zone depots, it is believed that the ammunition was destined for Soviet troops and only hauled by VP personnel.

25X1X (3)

Comment: The installations to which the tion was shipped are believed to be:

Gotha

New ammunition depot in the woods near Metebach, about 7 km NW of (4)Gotha.

Hoyerswerda:

An ammunition depot is not known

in that area.

Brandenburg:

Medium-sized depot in the Arado plant buildings, primarily storing rocket launcher ammunition.

Fuerstenberg: Large ammunition depot in Fuersten-

berg-Steinfoerde.

Schwerin-Sternbuchholz: Re-established section of the former German Army ammuni-25X1A tion depot. (5)
